
LINEA OCEANO
WALK IN BATHTUBS

linea
Oceano

OUR RANGE OF "MADE TO MEASURE" PRODUCTS:

The range of Linea Oceano walk in bath tubs for the elderly and disabled is really wide: **6 models in 29 different versions** to offer the best solution based on the difficulty of movement of the client and the available space in the bathroom.

Itaca

the most economical bathtub

Tonga

the ideal bathtub for small bathrooms

Samoa

the most suitable for people with disabilities

Bali

the bathtub for those who seek design

Capri

for those who want maximum relaxation

Antigua

for those who want the top of our range

MATERIAL WE USE

All our bathtubs are made of hand laid fiberglass and have a shining gel coat surface that is an integral part of the stratification, the supporting frame is made of stainless steel (Aisi304).

CHARACTERISTICS OF OUR BATHTUBS

01. SEALING OF DOOR:

the door seals perfectly by means of silicone rubber gasket, the main advantage of this material is that the gasket will return to its original shape even after being closed for days greatly reducing wear and tear. The door is fitted with a self-centering locking system.

02. WIDTH OF THE DOOR

can range from 70 to 85 cm, according to the model, obtaining a large, easy and safe entry and exit from the tub

03. DOOR OPENING

the door opens strictly outwards to 180 ° thus leaving completely exposed the comfortable seating inside (a door that opens inward is a major barrier for those who must get in or out of the tub). The door lever is not situated on the inside of the door so there no levers or metallic mechanism of any kind inside the tub that could pose a serious risk of injury to anyone bathing in the tub.

04. INSIDE SEATING

fully exposed built-in seat, wide and 53 cm high. (Not an unstable stool!) It allows you to sit in the tub from the outside; the users rotate their legs inward, like getting in or out of a car. The height makes getting up a minimum effort, as in a chair at home; disabled people can go directly, without gradients, from the wheelchair to the seat inside the tub.

05. ANGLE OF THE SEATING

the particular inclination prevents slipping forward resulting in possible danger (stopping the undesirable slippage caused by the inevitable floating of the legs due to the gradual filling of the tub).

06. RECESS FOR HYGIENE

positioned in the middle of the seat allows the personal hygiene without having to get up from a comfortable position.

07. GRAB BAR

The grab bars placed on board and inside of the tub, gives the user safe and free movement getting in or out of the tub.

08. TAPWARE

located on the front of the tub comfortably near your fingertips, consisting of mechanical mixer, tub overflow, water in let, pull-out hand shower, on demand shower rod.

Itaca

Everywhere
for everyone

A tub for all spaces and for
all budgets.

OPTIONAL. THE FRIENDLY TECHNOLOGY OF YOUR WELL-BEING.

01. AIR JET HYDRO MASSAGE KIT

works with indirect air delivered by 12 nozzles (3 lumbar, 3 calves, 6 feet). Avoids the swirl of the air-water systems, gentle and suitable for elderly people with fragile capillaries. It can be used only as a foot bath. On demand can be combined with aromatherapy.

02. CROMO THERAPY

light source emitted from 2 LEDs. Colors can have a significant emotional and psychological well-being effect. Red, blue, green and yellow, plus white are the fundamental colors. Those hot like red, yellow and orange are considered stimulating and energizing; calming and relaxing, are the cold ones such as blue, purple and green.

03. HEATED BACK REST

is a system designed to increase comfort at the time of entry in the tub, delivers a temperature of about 37°C.

04

05

04. QUICK FILLING SYSTEM

more than 50 liters of hot water ready to use allow the person to have feet and legs immediately soaked in a hot water.

05. QUICK DRAIN

in less than 2 minutes, the bath is empty.

06. THERMOSTATIC MIXER

with safety lock for hot water temperature, shower head and switch valve, integrated spout for filling of the tub.

07

07. DOOR SAFETY MECHANISM

that prevents accidental opening of the bath door, by third person helping who is in the bath.

SANITARY WARE FOR THE LESS ABLE.

Our proposal for a bathroom for the less able.

The image shows a bathroom equipped with some Linea Oceano aids.

A tilting wash basin operated by a lever on the front.

A tilting mirror with safety glass surface.

A Wc-bidet, the bidet function is achieved thanks to a thermostatic mixer complete with hose and hand shower with built-in open/close valve.

We also have a wide range of horizontal and vertical grabbars to satisfy the need for safety and comfort.
